

# How to Legally Decline a Vaccine

STEP one. Do not 'refuse' a vaccine or otherwise you will be considered belligerent. Instead you can politely decline their services by doing the following.

STEP two. Ask the doctor if the vaccine has MRC-5 in it (they all do, these are aborted fetus cells and other DNA). If it does, you have the right to decline.

STEP three. Also ask if there is a possibility of a "iatrogenic reaction" (an adverse reaction caused by multiple compounds or drugs interacting with each other) from the vaccine (they all do). When the doctor says, "Yes it does"; that is your "Get out of Vaccine Free Card". Thank the Doctor for their offer and walk away.

Remember, doctors have sworn the Hippocratic Oath (which is to do no harm) and they MUST honor it. This is how we can legally (and respectfully) decline their offered mandated services and there is absolutely NOTHING they can do about it! Now you know!

["iatrogenic reaction" *From Wikipedia, the free encyclopedia.*

*Iatrogenesis* (from the Greek for "brought forth by the healer") refers to any effect on a person, resulting from any activity of one or more other persons acting as healthcare professionals or promoting products or services as beneficial to health, which does not support a goal of the person affected.

*While some have advocated using the term to refer to all "events caused by the health care delivery team", whether "positive or negative", consensus limits use of iatrogenesis to adverse effects, including (in the broadest sense) all adverse unforeseen outcomes as well as foreseen outcomes from medication or other medical treatment or intervention. Some iatrogenic effects are clearly defined and easily recognized, such as a complication following a surgical procedure (e.g., lymphedema as a result of breast cancer surgery); less obvious ones, such as complex drug interactions, may require significant investigation to identify. ]*

## Iatrogenic Disorders

Iatrogenic disease is the result of diagnostic and therapeutic procedures undertaken on a patient. With the multitude of drugs prescribed to a single patient adverse drug reactions are bound to occur. The Physician should take suitable steps to detect and manage them.

*Iatrogenic* (of a disease or symptoms) induced in a patient by the treatment or comments of a physician.  
[Chambers English Dictionary]

One of the basic principles in treatment stated by Hippocrates is "First do no harm". Stories of medical remedies causing more harm than good have been recorded from time immemorial. An iatrogenic disorder occurs when the deleterious effects of the therapeutic or diagnostic regimen causes pathology independent of the condition for which the regimen is advised. It would be impossible to provide the benefits of modern medicine if reasonable steps in diagnosis and treatment were withheld because of possible risks [1]. Diagnostic procedures (mechanical and radiological), therapeutic regimen (drugs, surgery, other invasive procedures), hospitalization and treating doctor himself can bring about iatrogenic disorders.

PLACE SHARE WITH EVERYONE YOU CARE ABOUT.

Thank you for visiting <http://www.JMJsite.com> and please tell others about this website. If only the people would listen to the sermons and read the articles found herein; at least a few more people would save their immortal souls who will otherwise go to hell forever! I pray that you will live in such a way that the Good God will always constantly Bless you while He keeps you from all sin. May Jesus, Mary, and Saint Joseph obtain for you every grace you need to live

and die in the True Church in the state to sanctifying grace – having obtained that degree of holiness it is God's most holy will that you obtain.
